PROJECTS

InterviewX | AI-Powered Mock Interview Platform ([Live](#)) | ([GitHub](#))

- Engineered an AI-driven interview engine leveraging the GPT-4o Mini API, dynamically parsing user resumes to generate 50+ context-aware technical questions and automated performance metrics per session.
- Architected a resilient, multi-provider authentication pipeline utilizing Firebase and custom JWTs, securely managing session states and onboarding 1,000+ concurrent users with zero data leaks.
- Orchestrated a scalable monetization service by integrating the Razorpay webhook ecosystem, seamlessly processing token-based financial transactions with a 99.9% success rate and sub-second latency.

Real-Time Chat Application ([Live](#)) | ([GitHub](#))

- Designed and deployed a highly available MERN-stack distributed messaging system supporting 500+ concurrent users, utilizing Socket.IO to achieve bidirectional, event-driven communication with sub-50ms latency.
- Optimized MongoDB data models and indexing strategies to persistently store 10,000+ messages, reducing database read times by 35% and efficiently managing real-time user presence tracking.
- Developed 20+ secure RESTful endpoints equipped with custom middleware validation and error-handling, ensuring high data integrity and seamless cross-client synchronization.

Expense Tracker ([Live](#)) | ([GitHub](#))

- Built a high-throughput financial processing engine capable of ingesting 1,000+ monthly transaction records, employing MongoDB aggregation pipelines for automated categorization across 10+ dynamic parameters.
- Implemented centralized state management to handle rapid, complex CRUD operations, eliminating redundant network payloads and improving overall application throughput.
- Engineered a responsive, data-rich analytics dashboard using React and Tailwind CSS, resolving Client-Side Rendering (CSR) bottlenecks and accelerating financial data visualization by 40%.

EDUCATION

Guru Nanak Dev Institute of Engineering

Rohini, Delhi

Bachelor of Technology in Computer Science and Engineering | CGPA: 7.8/10.0

Expected 2028

Coursework: Data Structures & Algorithms, Operating Systems, OOP, DBMS, Computer Networks

Prabhu Dayal Public School

Shalimar Bagh, Delhi

Class XII (Senior Secondary) | (CBSE) | PCM

2023

Class X (Secondary) | (CBSE)

2021

SKILLS

Languages C, C++, JavaScript, Python, Java

Web & DB React.js, Next.js, Node.js, Express.js, Tailwind CSS, MongoDB, MySQL, Drizzle ORM

Tools & Tech Git/GitHub, Docker, Kubernetes, tRPC, REST APIs, JWT, Firebase, Postman

EXTRA-CURRICULAR ACTIVITIES

- Selected NSS volunteer at DSEU and collegiate IT team member, driving community initiatives and managing technical operations for major campus events.
- Competitive chess player ([mintmate345](#), 1812 Rapid), applying advanced tactical analysis and defensive integrity.

ACHIEVEMENTS

- Awarded a 1 Lakh INR prize for technical innovation at the Delhi Yuva Startup Festival 2026.
- Ranked as a Top 50 Finalist in the Delhi AI Grind.
- Conquered 400+ Data Structures and Algorithms (DSA) challenges on LeetCode.
